

MASTERCLASS SERIES

A PRACTICAL UNDERSTANDING OF PROFESSIONAL INDEMNITY INSURANCE

SPECIALLY DESIGNED TO CATER FOR FINANCIAL PRACTITIONERS

Risk of being sued is a pervasive aspect of every individual and business, and it is a risk of catastrophic potential. This is especially so in our industry where clients are getting more litigious and demanding. Therefore, it is important, for us as financial practitioners, to understand the basic legal principles which define liability, risk and insurance, as well as the structure of the PI insurance contract.

By the end of the programme, participants will be able to:

- 1/ Understand the legal principles of negligence and legal liability
- 2/ Learn the factors which constitute legal liability from the insurance perspective
- 3/ Appreciate the available Liability Insurance products in Singapore
- 4/ Identify the common structure of a PI insurance contract for financial practitioners in Singapore.
